

WORK PROCEDURE

SAN-SEC-005A

WELCOME HOME VISITORS TO OUR DRILLING SITES

OBJECTIF

To ensure that visitors to our drilling sites are well supervised, we ask our workers to welcome them appropriately. In the same way as welcoming any visitors to our homes, instructions for use must be provided. The purpose of the procedure is to properly supervise visitors and to ensure that they are familiar with the safety measures surrounding the work of a driller, and that they have the equipment to be on a drilling site. This demonstration will lead workers through a process of commitment to OHS.

APPLICATION

This procedure applies to all employees of MACHINES ROGER INTERNATIONAL. The procedure applies to any visitor who comes to a drilling site (set-up). The supervisor is not considered a visitor.

The drilling site starts at the yellow ribbon.

INTERPRETATION

The personnel having the authority for the interpretation of this document is the OHS Superintendent. Any request for modification, revision or update must be made to this person.

RESPONSABILITIES

The supervisor must ensure that this procedure is respected. Workers must apply the procedure with enthusiasm and welcome visitors

PERSONAL PROTECTIVE EQUIPMENT

The driller or the helper must be sure that the visitor is wearing appropriately :

- Safety hat
- Safety glasses
- Blue light behind the hat
- Safety boots
- Gloves
- Ear protection

WELCOME PROCEDURE

When visitors have arrived at the yellow ribbon, they must make their presence known to workers at the drilling site by calling a light and await the arrival of the driller or helper.

The driller or the helper will join them at the ribbon and welcome them in this way

Hello, my Name is _____. I am a driller or helper driller and welcome to
drilling site # _____.

The worker will then provide the following information:

General informations :

- Positioning of fire extinguishers
- Positioning of the first aid kit
- Eyewash station positioning
- Radio communication in case of emergency
- Emergency stop buttons
- Location of the nearest refuge

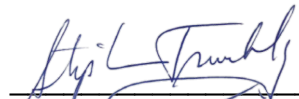

On work in progress:

- Drilling,
- Uprooting of stems,
- Replace the rods,
- Empty from the tube,
- Mechanical works,
- Building work,
- Mobilization or demobilization, or
- Padlocking (If this is the case, visitors must have a personal padlock in their possession and affix it to cross the tape)

On environmental conditions:

- Environment
- Condition of the accesses and the floor
- Ground conditions if necessary

The visitors can cross the ribbon and the supervisor is responsible of the visitors
